ABLETEK PROVIDES REMOTE PERFORMANCE MANAGEMENT SOLUTIONS TO CUSTOMERS

Leading Unified Communications Provider Helps Customers Pre-Assess and Continuously Monitor Network Infrastructure for Smooth Operations

CROSBY, TX – August 1, 2011 – Abletek, an industry leader in unified communications, announced today that the company is providing its customers with Remote Performance Management Solutions. This technology offers a cost-effective remote monitoring and management capability to diagnose underlying network problems, assess network readiness and monitor application performance. This advancement is allowing businesses to capitalize on powerful applications such as VoIP, video, SaaS/ cloud services, disaster recovery and desktop virtualization.

Gartner analysts caution that “75 percent of enterprises that do not perform a pre-implementation analysis of their IP network infrastructure will not achieve a successful VoIP implementation.” Transitioning physically separate voice and data networks onto a single shared infrastructure without compromising the quality of either voice traffic or data traffic will require new practices and procedures. Remote Performance Management Solutions play a central role in successful network assessment.

“The cloud is growing and as a result businesses are becoming increasingly dependent on cloud-based technologies to run their businesses,” commented Bill Parker, President of Abletek. “One example revolves around VoIP technology. Many business owners are attracted to VoIP because of its cost savings and applications that drive employee productivity; however some business owners hesitate because they are concerned about sacrificing call quality. This often occurs when companies conduct business with a technology provider that does not have the proper technical expertise or the tools to successfully deploy IP based solutions. Leveraging advanced Remote Performance Management Software pinpoint network drains, all the way down to the appliance. The tool provides valuable insight that can determine which appliance such as a PC within an organization is sucking up bandwidth causing poor voice or video quality.”

In order to keep up with the rapid pace of technology, data networks will need to become much stronger, faster, flexible and transparent. The success of a business’s operations will be strongly correlated to network performance and Remote Performance Management Solutions allow businesses to diagnose network issues and

resolve problems immediately. Data networks are the lifeblood of business operations and companies like Abletek are proactively protecting their customers, increasing their profitability and providing them with a competitive advantage.

ABOUT ABLETEK

Abletek is not your typical IT & communications company. We are a TECHNOLOGY SOLUTION PROVIDER and we care deeply about helping you maximize your productivity through effective Managed Services (MSP), IT, communications and related business technology solutions, and while a lot of companies may talk about increasing your productivity, Abletek actually delivers.

ABLETEK will remove the burden of managing your network and communications infrastructures by providing everything needed to maintain your servers, workstations, laptops, Pocket PCs/PDA/Treo, Switches, Routers, Email, Printers, VoIP, SIP, Digital & Analog Communications systems and more.
